DETAILED ACTION

1. This office action is in response to the RCE filed on 01/12/06.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 39-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsinberg (US 4,794,447) in view of Tanaka et al. (US 4,309,726) (hereafter Tanaka).

Tsinberg discloses a receiver (Fig. 1) comprising of a HDTV decoder (26) and monitor (28). Tsinberg, therefore, fails to teach "a controller operable to examine the quality of the data stream, an output unit operable to output the HDTV signal and to stop outputting the HDTV signal when the quality of the data stream is lower than a predetermined acceptable quality for a predetermined period of time".

Tanaka et al discloses PCM reproducing unit (Fig. 2, Abstract) wherein the outputting of the decoded signals is controlled by "a controller" (23) and "an output unit" (25). It would have been obvious to one of ordinary skill in the art at the time of the invention to implement Tanaka et al's quality control technique for use in Tsinberg's television receiver. Such modification Would overcome the noise problem associated with reproduced signals.

4. In accordance with 37 CFR 1.175(b)(1), a supplemental reissue oath/declaration under 37 CFR 1.175(b)(1) must be received before this reissue application can be allowed.

Claims 39-54 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251. See 37 CFR 1.175. The nature of the defect is set forth above.

Receipt of an appropriate supplemental oath/declaration under 37 CFR 1.175(b)(1) will overcome this rejection under 35 U.S.C. 251. An example of acceptable language to be used in the supplemental oath/declaration is as follows:

"Every error in the patent which was corrected in the present reissue application, and is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant."

Response to Arguments

5. Applicant's arguments filed 01/16/06 have been fully considered but they are not persuasive.

In the REMARKS filed on 01/16/06, applicant has argued, on page 7, "Tanaka discloses a system in which errors ...error has been exceeded". However, in Tanaka, the audio is muted when the count of errors exceeds a threshold. Effectively, if the count of errors still remains different from the threshold (i.e. exceed the threshold), the audio would be still muted for that subsequent period.

Conclusion

6. This is a RCE of applicant's earlier Application No. 09/669,916. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had

been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
